Shellac Nails - Impressive Results!!!

- ✓ No Acrylics
- ✓ No Infills
- ✓ No False Nails
- ✓ Protects & Strengthens

This new hybrid nail polish is nothing short of absolutely marvelous. Of, all my years (let me tell you it's a lot) in the Beauty & Nail arena my biggest "pet" dislike is waiting for nail polish to dry...

This Shellac polish puts a total end to that - it dries instantly without smudges or creases. It survives those accidental knocks that can happen after polish has been applied. It's application is thin and very strong that it protects the natural nail instead of damaging the nails like artificial nails may do. Shellac is a long lasting polish with a glorious shine and it is available in a variety of appealing colours. It lasts for 14 days (I personally set out to prove that claim) - it does not wear off shabby at all and grows with the nail.

It is designed for fingernails and toenails it can be received as a single service or included with your Manicure and/or Pedicure. Shellac nail polish provides a healthy groomed appearance to the nails at all times. This product is a big ✓ on my list of highly recommended.

Enjoy a Shellac finish with your Manicures & Pedicures
